ABOUT THE MAJOR

The Bachelor of Science degree program has two plans, each designed for specific career goals: The Pure and Applied Mathematics Track; and The Applied Statistics and Data Analytics Track. The student's advisor and mentor will help the student choose the best track, based on the student's interests.

This track offers students a background in pure or applied mathematics, with emphasis on analytical skills and problem solving. It will prepare students for further study in mathematics or mathematics education or for a career in industry or government.

ABOUT THIS MAP

This program map is intended ONLY as a guide for students to plan their course of study. It does NOT replace any information in the Undergraduate Catalog, which is the official guide for completing degree requirements. Use this map to help plan and guide your experience at UWG, including academic, co-curricular, and discovery opportunities. Everyone's experience is different and activities in this map are suggestions. Always consult with your advisors whenever possible for new opportunities and updates.
