INTERESTED IN EXPLORING OTHER MAJORS AT UWG?

We have a variety of majors in addition to Nursing that allow students to work in diverse health-care and helping professions! See information below or set up a time to discuss these with your advisor.

BACHELOR OF SCIENCE IN SOCIAL AND BEHAVIORAL HEALTH

The Bachelor of Science in Social and Behavioral Health provides students with the opportunity to learn foundation skills necessary to succeed in the dynamic health and social services environments. Courses in the program teach students how community and social factors contribute to a variety of public health problems, policies, and solutions; how to design, administer, and assess social service and/or behavioral health programs to ensure their quality and effectiveness; and how to help people navigate the healthcare system to find the resources they need to be healthy. Students will learn this through courses in health services, health analytics, complementary & alternative healthcare, cultural & social aspects of health, and behavioral & mental health. Upon graduation, students are prepared for advanced graduate and professional school education, and for entrance into the job market in a variety of health- and social services-related settings such as hospitals, public health agencies, research laboratories, mental health agencies, assisted living facilities, insurance companies, rehabilitation facilities, and non-profit organizations caring for marginalized populations.

HEALTH AND COMMUNITY WELLNESS

Students have the option of taking 15 credit hours of electives or choosing an approved minor such as Biology, Business Administration, Management, Psychology, Sociology, Nutrition Promotion & Education, Sport Management, Coaching, or others. Students also have the option to choose 1 of 4 professional tracks: Athletic Training, Physical Therapy, Occupational Therapy, or Dietetics. These tracks will prepare students to apply for a Master's or doctoral program in the designated field of study.

ADMISSION TO THE SCHOOL OF NURSING IS HIGHLY SELECTIVE.

In order to remain a Focus Area Health Profession student, you must maintain a 2.5 PGPA (program GPA) after completing 24 credit hours. The minimum PGPA to apply is a 2.75. The average PGPA of the students that have been accepted the past several years has been roughly a 3.3. Academic Advisors recommend students having at least a 3.3 to be marginally competitive. Advisors encourage students to be aware of their own academic standing, so when they do meet with an advisor they are prepared to hear the honest and realistic prognosis for where they stand. Should a student not be competitive, advisors will explain in detail alternate routes to nursing or other career and helping profession possibilities.

Only your Nursing Academic Advisor can pull your program GPA. The GPA listed on Wolf Watch is not the GPA that is used for admission.
