

ABOUT THE MAJOR

The Bachelor of Interdisciplinary Studies is an inquiry-centered degree for students who want to engage in extended study of a complex problem--one with multiple dimensions or interacting parts that cannot be adequately addressed fully within the confines of a single discipline (field of study). For example, a comprehensive answer to the question, "Can democracy work at a global scale?", would need to combine insights from a mix of disciplines, such as political science, sociology, mass communications, psychology, geography, economics, philosophy, history, and literature. Addressing complex problems necessitates: depth of knowledge in multiple academic fields, intellectual boundary-crossing in search of ideas, concepts, and techniques, and integration of these to produce a comprehensive solution or understanding. Thus, the BIS offers an academic pathway for students who want to work both within and across multiple academic disciplines while systematically developing the techniques and tools of interdisciplinary inquiry and problem-solving.

ABOUT THIS MAP

The Four-Year Plan is designed only as a guide. It does not guarantee; 1) that all courses listed will be offered during a given semester, or 2) if they are offered that the scheduling will not conflict. Estimated time of completion is based on 15 hour semesters, with no summer classes. A change in hours or courses taken during the summer will either reduce (taking 18 hrs or summers) or extend (taking less than 15 hrs) the time needed. Use this map to help plan and guide your experience at UWG, including academic, co-curricular, and discovery opportunities. Everyone's experience is different and activities in this map are suggestions. Always consult with your advisors whenever possible for new opportunities and updates.
