

Tanner Health System School of Nursing

The University of West Georgia provides professional licensure information for current and prospective students who are interested or enrolled in University programs that may lead to professional licensure. Each state/territory defines its own requirements for licensing and certification in professional fields.

The information below highlights the professional agency associated with the designated program and we have identified whether the program meets or does not meet licensure requirements for all 50 states. This is not a comprehensive list, but it is intended to provide a starting place for searching and verifying licensure requirements. Please note that this table does not include an evaluation of state-specific requirements beyond educational or curricular requirements. Please contact Dr. Oliver Duah at oduah@westga.edu if you are considering professional licensure in a state other than Georgia after completing your nursing education at the Tanner Health System School of Nursing, or if you have any additional questions.

Nursing

Program	Professional Agency	Determination	Disclosures/Comments
Bachelor of Science (B.S.) in Nursing – RN	National Council of State Boards of Nursing (NCSBN)	Meets educational or curricular requirements leading to licensure in all states/territories except Northern Mariana Islands and Puerto Rico.
